Incorporating extensive community feedback, the Campbell Grain project has been fundamentally reimagined. Please join us on September 14 for a public informational session focused on the redesign. Members of the project team will be available to answer questions and engage in discussion.

Changes incorporated in the redesign include:

- Reconfiguring the project as a 100% age 55+ senior community
- Reducing the overall number of apartments from 82 to 70
- Eliminating 25,000 square feet of built area
- Increasing the parking ratio to 1.3
- Embracing a more traditional architectural form
- No longer requesting a fixed assessment
